## Loss Control Services

Republic Indemnity's Loss Control consultants are trained to identify and help minimize workplace hazards. Our expertise covers a wide range of industries, such as construction, metal working, restaurants, hospitality, healthcare and more. No matter what the industry, employees have a clear way forward to quick, convenient access to safety tools, safety programs and online safety videos—from OSHA compliance to industry safety and more, plus end-of-course quizzes and completion certificates. They also have the opportunity to level up their safety program with a mobile loss control app that helps them avoid common pitfalls and maintain critical safety touchpoints.

**Republic  
Indemnity<sup>®</sup>**

**Republic Indemnity** is proud to employ some of the most highly-educated and best-trained experts in the workers' compensation industry. Insureds can easily access in-house loss control reps who will go onsite to identify workplace hazards and apply their considerable experience to worker injury challenges, providing safety tools and programs that go beyond the standard safety content. We know that our success depends on our ability to help you achieve positive results.

**Our Loss Control services include the following:**

***Hazard Assessment***

Before our Loss Control consultants visit your facility, they will already have conducted an analysis of your company's past loss experience. Their onsite assessment will then confirm information about your operations, hazards and controls. Focusing on the larger claims and any claim trends, they will review any changes to help prevent a reoccurrence and provide practical recommendations to help eliminate or minimize hazards.

***Educational Programs***

Managers and supervisors can learn fundamental skills such as accident investigation, self-inspections and supervisory communications. Employee awareness programs are available to guide employees in preventing accidents.

**Available programs include:**

- Lifting & Material Handling
- Slip & Fall Prevention
- Machine Guarding
- Safety Surveys
- Accident Investigation
- Hazard Identification
- Driver Training
- Establishing Safety Committees
- Communications
- Ergonomics
- Hazard Communication
- Job Safety Analysis (JSA)

### ***Safety Program Development/Enhancement***

We can assist you in developing a customized safety program or help you enhance an existing one. Sample Safety Program elements include:

- Injury & Illness Prevention
- Hazard Identification
- Emergency Action Plan
- Hearing Conservation
- Blood Borne Pathogens
- Forklift Training
- Lockout/Tagout/Blockout
- Respiratory Protection
- Heat Illness
- Musculoskeletal Injury Prevention

### ***Accident Analysis***

Even with good risk management controls, accidents can occur. Our consultants analyze all contributing factors to shed light on what is causing worker error and/or systems failure and prevent a reoccurrence. Our policyholders can also order statistical/graphical injury reports on an ad-hoc basis.

### ***Ergonomics***

Anyone who spends time sitting at a computer can feel better and work smarter by following the guidelines of a structured Ergonomic Program. The repetitive nature of data entry may lead to painful musculoskeletal injuries that can be prevented with basic training and adjustable equipment. Contact your Republic Indemnity Loss Control consultant for more information.

### ***Resource Library***

Policyholders can stream workplace safety training videos applicable to all industries. Available upon request.

### ***RI Loss Control App***

Download our mobile safety app, which can be an effective tool in creating and maintaining a safe work environment.
