Loss Control Services

Republic Indemnity is proud to employ some of the most highly educated and best-trained experts in the workers' compensation industry. Our Loss Control specialists average 14 years tenure at Republic and apply their considerable experience to your worker injury challenges. We know that our success depends on our ability to help you achieve positive results.

Our Loss Control services include the following:

Physical Surveys – Before our Loss Control consultants visit your facility, they will already have conducted an analysis of your company's past loss experience. Their onsite assessment will then confirm information about your operations, hazards, and controls. Focusing on the larger claims and any claim trends, they will review any changes to help prevent a reoccurrence and provide practical recommendations to eliminate or minimize hazards.

Educational Programs – Managers and supervisors can learn fundamental skills such as accident investigation, self-inspections, and supervisory communications. Employee awareness programs are available to guide employees in preventing accidents. Available programs include:

- *Lifting & Material Handling*
- *Slip & Fall Prevention*
- *Machine Guarding*
- *Safety Surveys*
- *Accident Investigation*
- *Hazard Identification*
- *Driver Training*
- *Establishing Safety Committees*
- *Communications*
- *Ergonomics*
- *Hazard Communication*
- *Job Safety Analysis (JSA)*

Loss Control Services

Safety Program Development/Enhancement – We can assist you in developing a customized safety program or help you enhance an existing one. Sample Safety Program elements include:

- *Injury & Illness Prevention Program*
- *Hazard Identification Program*
- *Emergency Action Plan*
- *Hearing Conservation Program*
- *Blood Borne Pathogens*
- *Forklift Training*
- *Lockout/Tagout/Blockout*
- *Respiratory Protection*
- *Heat Illness Program*

Accident Analysis – Even with good risk management controls, accidents can occur. Our consultants analyze all contributing factors to shed light on what is causing worker error and/or systems failure and prevent a reoccurrence. Our policyholders can also order statistical/graphical injury reports on an ad-hoc basis.

Ergonomics – Anyone who spends much time sitting at a computer can feel better and work smarter by following the guidelines of a structured *Ergonomic Program*. The repetitive nature of data entry may lead to painful musculoskeletal injuries that can be prevented with basic training and adjustable equipment. Contact your Republic Indemnity Loss Control consultant for more information.

Resource Library – Policyholders can access workplace safety training videos applicable to all industries. Available upon request.
